

Upsilon Meson Υ

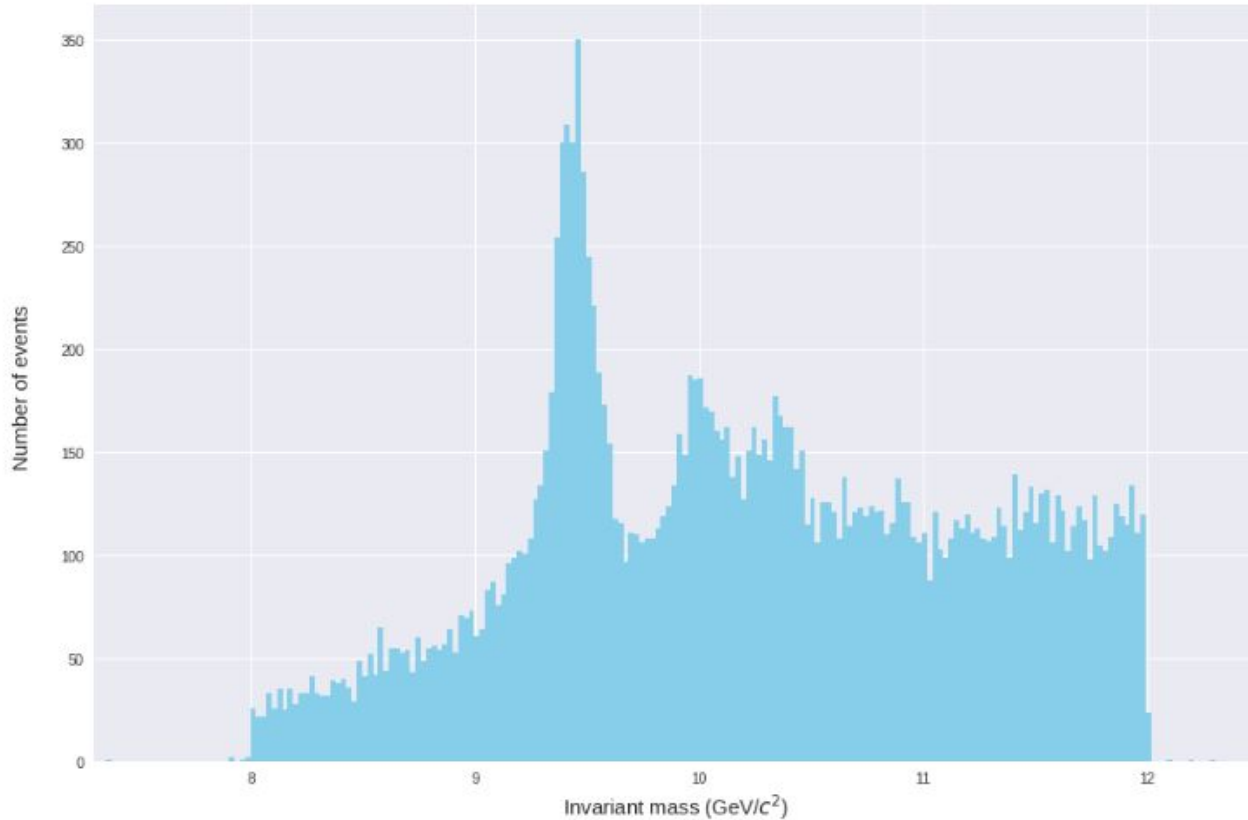

00000000

Measured distribution of events with two particles

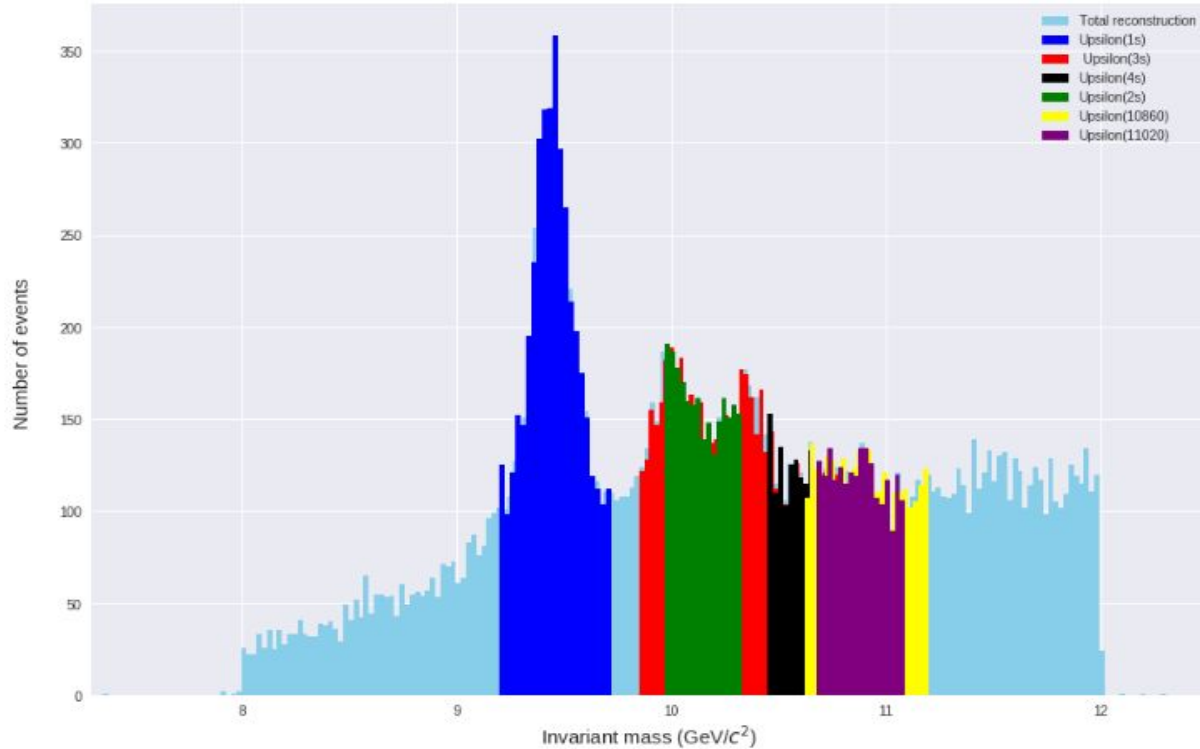

We have the reconstruction of the invariant mass of 20,000 events.

Measured distribution of events with two particles

After the first cut, we have 18881 events considering only global muons.

Measured distribution of events with two particles

We have:

4117 candidates to Upsilon(1S)
2395 candidates to Upsilon(2S)
6008 candidates to Upsilon(3S)
1240 candidates to Upsilon(4S)
2822 candidates to Upsilon(10860)
2013 candidates to Upsilon(11020)
